Adams County Wind, LLC, a subsidiary of NextEra Energy Resources, LLC (NextEra), proposes to construct, operate, and maintain a wind energy generating facility (the "Adams County Wind Project" or the "Project") in eastern Adams County, Colorado with a generating capacity of up to 200 megawatts (MW). The Adams County Wind Project is proposed to be located on approximately 102,603 acres of private and state land, used for dryland and irrigated farming, pasturage, other agricultural uses and rural residential uses. The Project would include up to 71 three-bladed 2.82-MW wind turbine generators manufactured by General Electric, together with pad mount transformers, an underground electrical collection system, a project substation, an operations and maintenance (O&M) building, private gravel access roads, transmission line, permanent meteorological performance towers, an aircraft detection lighting system radar tower, and other ancillary facilities. See "Adams County Wind_Written Description.pdf" for additional Project details.

Conceptual Review Meeting. The 5-acre site located at 6700 Washington Street in Denver, currently housing a nursery and greenhouses, is proposed for redevelopment. The intended buyer is the adjacent DTI Trucking business. The redevelopment aims to bring the site into compliance with stormwater detention standards and position it for future development, including a new building, associated infrastructure, and parking.

Current Site Conditions:

- Existing Use: Nursery and greenhouses.
- Size: 5 acres.
- Location: 6700 Washington Street, Denver.

Redevelopment Objectives:

1. Stormwater Detention Compliance: The site will be upgraded to meet current stormwater detention standards. This involves implementing best management practices (BMPs) to manage stormwater runoff effectively, reducing pollutants and preventing flooding. Since land cost is at a premium we will be looking to make the footprint as small as possible.
2. Amended Site Plan: The site plan will be amended to accommodate future development. This includes provisions for a new building, infrastructure, parking, and other necessary facilities

Proposed Changes:

- Stormwater Management: Installation of stormwater detention systems to control runoff and improve water quality
- Infrastructure Development: Planning for utilities, drainage, and other essential services to support the new building and operations.
- Parking Facilities: Designated areas for parking and site access drives to accommodate the needs of DTI Trucking and future site users.
- Building Construction: Space allocation for a new building that aligns with the current I-2 Zoning.

Benefits:

- Environmental Compliance: Ensuring the site meets stormwater management standards protects local water bodies and reduces environmental impact
- Enhanced Usability: The amended site plan will make the site more functional and ready for future development, supporting the growth of DTI Trucking.
- Improved Infrastructure: Upgraded infrastructure will provide better services and facilities for the site's users.
